SRUJAN MIRJI

AI Product Manager Intern | Technical Project Management

Hubballi, India | +91 96633 41218 | srujanmirji10@gmail.com | linkedin.com/in/srujanmirji | github.com/Srujanmirji

SUMMARY

Computer Science undergraduate and product builder who takes AI products from idea to shipped. Runs a web development agency with a team of 6, delivering 4 client projects end to end from discovery and scoping through pricing, timelines, and launch. Builds products with AI-assisted development across multi-agent AI, marketplaces, and mobile. Seeking product and technical project management internships.

EXPERIENCE

Founder and Product Lead

Tanvo Tech (Web Development Agency) | Hubballi, India | Aug 2026 - Present

- Run a web development agency delivering websites and digital products for clients, owning the full lifecycle from first conversation to launch and post-launch support.
- Own client discovery, requirements, scope, pricing, and delivery timelines across 4 client projects.
- Convert client requirements into written scopes, build plans, and release milestones, making scope-versus-timeline trade-off calls as projects move.
- Coordinate a team of 6 across design, build, and deployment as the single point of contact for clients.

Developer's Team Intern

AXILEX Group of Companies | India | May 2026 - Aug 2026

- Supported the development team on product initiatives, converting requirements into deliverable tasks and tracking them through to release.
- Coordinated with team members to clarify scope, unblock issues, and keep project documentation current.

Campus Ambassador

GeeksforGeeks | Hubballi, India | Jan 2026 - Jun 2026

- Organized 3 hackathons and technical workshops across colleges, owning planning, college coordination, outreach, and on-day execution.
- Represented GeeksforGeeks as official campus ambassador, driving student participation across the campus community.

PROJECTS

AegisAI - Multi-Agent AI Copilot | Python, FastAPI, LangGraph, Three.js

- Defined the concept for an enterprise copilot in which six specialized agents handle planning, knowledge retrieval, operations, maintenance, analytics, and risk validation.
- Mapped agent orchestration flows in LangGraph, deciding what each agent owns and where a human stays in the loop.
- Shipped an interactive WebGL interface so operators can see and control agent activity in real time.

SkillSwap - Peer-to-Peer Skill Marketplace | Next.js, TypeScript, MongoDB

- Designed a two-sided marketplace where users trade skills using time credits instead of money.
- Addressed the marketplace cold-start problem with a reputation and verification system that bootstraps trust between strangers.
- Scoped and shipped onboarding, profiles, discovery, search, messaging, wallet, and admin controls.

SubTracker - Subscription Management Platform | React, Node.js, MySQL

- Built a subscription tracker with spending analytics, budget alerts, and shared-expense settlement.
- Framed the dashboard around metrics users act on: spend trends, savings opportunities, category breakdown, and renewal alerts.

Smart Vision Assist - Offline Accessibility App | Kotlin, TensorFlow Lite, YOLOv8

- Built an offline Android app that detects objects and speaks spatial guidance for visually impaired users.
- Chose on-device inference so the app works with no internet connection and no user data leaving the phone.

SKILLS

Product Management: Product discovery, requirement gathering, PRDs, user stories, scoping, roadmapping, prioritization, sprint planning, backlog management, cross-functional coordination, timeline and risk tracking, stakeholder communication, KPI definition

AI: LLM applications, multi-agent systems, agent orchestration (LangGraph), prompt engineering, AI-assisted development, computer vision (YOLOv8, TensorFlow Lite)

Technical: React, Next.js, TypeScript, Python, FastAPI, Node.js, SQL, PostgreSQL, MongoDB, REST APIs, Git, Docker, Vercel

Tools and Methods: Agile, Scrum, Kanban, Jira, Confluence, Trello, Notion, Figma, Slack, Google Workspace, Excel

EDUCATION

Bachelor of Engineering (B.E.), Computer Science and Engineering

Jain College of Engineering and Technology, Hubballi, India | Sep 2024 - Sep 2028 (Expected)
